John,

I have all three shapefiles with locations done (Upper Animas, Cement, and Mineral), I am adding the new site designation names so that you can search in the ARSG water quality database. I also want Jim Herron to double check some of the sites in Mineral Creek before handing off. I will need another day or two. I will shoot for Tuesday next week.

Sorry for the delay, I just want it to be as close to perfect as possible.

Have a good weekend.

Kirstin

Kirstin,

Now you and John are linked. Also, his phone is: [303-312-6118](tel:303-312-6118).

An additional note to both of you: the USGS report (two volume – 1651? I think) has a CD with the mine locations – hopefully in a useable format. So that can be included as a layer information.

Thanks for the help on this.

Steve
